ENGLISH / ESPAÑOL

WHAT YOU GET

THE WHOLE NETWORK, IN VIEW.

FOR PACKING HOUSES

01

ACCESS

EVERY SHARED DOCUMENT, INSTANTLY

Back-office compliance opens one screen and finds every grower's spray recommendations, checklists, and signed documents.

✓ NO STACKS, NO SEARCHING

02

CONTROL

REQUEST A DOCUMENT, ON THE RECORD

Ask any linked grower for a document — they see the request on their Data screen and share the match straight back.

✓ NO MORE CHASING PAPER

03

OVERSIGHT

KNOW AN ORCHARD WITHOUT DRIVING TO IT

QC and the sales desk see a block's real-time PHI, spray applications, and maturity — starch, brix, pressure — from their desk. Never re-audit in person.

✓ NO DRIVE, NO RE-AUDIT

04

SCALE

RUN YOUR OWN BLOCKS, TOO

Vertically integrated? Idunn runs your own orchard operation in the very same platform.

✓ ONE PLATFORM, BOTH JOBS

SECURE DATA ROOM

Encrypted documents, controlled sharing — growers see only what you grant.

ONE SCREEN, EVERY GROWER

The whole network's documents, PHI, and checklists — one view for QC and the sales desk.

FIELD TO OFFICE, BILINGUAL

English and Español, row to back office.
